Profile

Computer Science student who enjoys solving problems and finding a way forward when they don't. Brings curiosity and a willingness to learn, with a focus on building software that makes everyday tasks easier.

Education

Bachelor of Computer Science | Griffith University — Expected Nov 2026

Griffith Award for Academic Excellence — 2025
Recognised among the top 5% of students across Griffith University for academic achievement.

Diploma of Information Technology | Griffith College — 2025

Technical Skills

Programming and data: Python, JavaScript, SQL, PostgreSQL, Firebase and PyTorch

Application development: React, React Native, Angular, Rails, Node.js and API integration

Tools and testing: Git, Docker, Linux command line and automated regression testing

Technical Experience

Software Development Intern | Carelever — Jul – Oct 2026
Brisbane, Queensland

- Developed a client onboarding application using React, Angular and Rails with AI-assisted coding tools, helping staff manage customer tasks, documents and progress.
- Integrated the application with the company's customer relationship management (CRM) system, syncing task completion and linking tasks and documents to customer records.
- Improved database query efficiency by preloading records and removing repeated database lookups.
- Fixed concurrent upload and task-deletion issues using database transactions and row locking to protect data consistency.
- Expanded Rails, Angular and React regression tests for integration and API behaviour; documented setup and deployment.

Full Stack Developer (Lead Developer) | Sabai Code — Jul 2021 – Jun 2022
Phnom Penh, Cambodia

- Led development of a mobile grocery prototype connecting customers directly with farmers selling fresh produce.
- Met with stakeholders and farmers across Cambodia to understand their day-to-day challenges and inform the prototype's requirements.
- Built the React Native interface and Node.js backend, with Firebase services and prototype hosting.

Technical Projects

Image Classification with PyTorch | University coursework

- Implemented CIFAR-10 image-classification models in Python/PyTorch and experiments comparing model depth, learning rates and regularisation.

Additional Experience

Website and IT Support | K9 Security Services (Volunteer) — Jul 2026 – Present

- Set up a small security business's website and provided technology advice as the owner's primary IT contact.

Team Member | Subway — Aug 2025 – Sep 2026

- Served customers and worked with colleagues during busy shifts, building communication and teamwork skills.
